																			0	.				

N.B. In the GitHub plain US keyboard version, the letter SHSHA is entered using ``/~`. In the localized non-US versions, the localized key (e.g. `à/À` in the French layout in place of ``/~`) can be used to redefine the Cyrillic sequence in `.XCompose` when only one `AccentCompose` layout is in use; alternatively the letter SHSHA can be entered using `AltGr-`/~` or `⌘ + 2 + / + w/W`

1 = numeric triggers for key sequence groups
(1 = standalone accents, 2 = Cyrillic, 4 = currencies,
7 = IPA (phonetics), 8 = Greek)
