= for non-US layouts, the localized key (e.g. à/À in the French layout) can be used to redefine the Cyrillic sequence in .XCompose when only one AccentCompose layout is in use; alternatively the letter SHSHA can be entered using AltGr-`/~ or ◫ + 2 + / + w/W

= localized keys different from US layout with US keys on AltGr plane
(grave/tilde, left and right brackets/braces, semicolon/colon, apostrophe/quotation mark)

= numeric triggers for key sequence groups
(1 = standalone accents, 2 = Cyrillic, 4 = currencies, 7 = IPA (phonetics), 8 = Greek)
